The Whole Truth About H and H Coffee

FOR more than twenty-five years the Hoffmann-Hayman Coffee Co. has been making an exhaustive investigation of the possibilities of coffee. Scientific research has revealed that coffee, to be nearest perfection, must be roasted by a process whereby the rich natural oils are retained—the roasting must be “timed” exactly in conformance with the blend to secure a perfect development of aroma and flavor.

In accordance with this investigation, as announced by the Hoffmann-Hayman Coffee Co., H and H Blend Coffee was roasted to combine all these requisites for good coffee. The test of time has proven it to be a wholesome, helpful, satisfying drink for the people of the Southwest. People, after drinking it, praise the coffee that Hoffmann-Hayman Coffee Co roast.
