

### Increased Demand Necessitates H & H Improvements

### Beautiful Garden Opens at Wolfe's Inn

Extensive improvements, designed to increase capacity of output, recently have been made in the big, modern quality plant of the Hoffman-Hayman Coffee Co., 691 Delaware Street. These improvements were necessitated by the ever-increasing popularity of and public demand for H & H and Sam Houston coffees, packed in reusable vacuum glass jars, in particular, and the other fine products offered by this concern in general, according to R. W. Menzies, of the H & H company.

Pictured here is a section of the packing department of the Hoffman-Hayman plant, where a large number of persons are employed. The special vacuum pumps and chamber, where all air is sucked out of the famous H & H and Sam Houston coffees crystalline jars, are shown. There is no cleaner, finer plant of its kind than the home of H & H products. Meticulous sanitation is maintained and every product of the company reaches the consumer absolutely clean and pure.

The Hoffman-Hayman company pioneered the vacuum packed, reusable glass jar in the State of Texas. Contrary to the belief of some, H & H Crystals really costs no more than other forms of packing. This is because of the re-use and the cash value of empty jars.

Sales figures compiled by Mr. Menzies show that Texas Girl coffee, another H & H product, now is the leader in its price field in San Antonio.

Beneath the arched limbs of beautiful liveoaks, and with flowers blooming in numerous clusters, the outdoor dining garden of Wolfe's Inn, six miles north on the Fredericksburg road, was opened Saturday for the 1935 summer season. The opening of the garden was delayed several weeks this year, due to uncertain weather, chill winds, rains and hail. But indications now are that summer really has come to stay a while and so the garden has been opened—which will be welcome news to hundreds of patrons of the celebrated resort, who have expressed disappointment from time to time that the opening had been delayed.

Perfectly prepared food, perfectly served in a perfect setting of

landscaped beauty and restfulness combine to make Wolfe's Inn one of the most celebrated, popular and attractive eating places in Texas. In addition to an established patronage from discriminating residents of San Antonio and immediate vicinity, the famous haven attracts guests from many distant points throughout this section of the state.

The owner and operator of the

Inn is worthy W. Wolfe. And he personally directs the entire operation of his celebrated tavern. Mr. Wolfe also personally selects and buys every item of food served at his place and personally supervises its storage, preparation and serving.

Spotless cleanliness is the rule at Wolfe's Inn. The kitchen and food storage compartments are open to inspection at all times.

### NOW IS TIME TO CHECK, KILL ANTS

Staffel Company Has Several New Products That Stop Pests.

An ounce of prevention is worth ten pounds of dead ants and now is the time to start to wage successful war on these annoying and damaging pests, according to Gerald Staffel, president of the Ford Staffel Company, which has three convenient stores in metropolitan San Antonio and which has been serving residents of this city and section for half a century.

The Staffel stores are at 321 East Commerce Street, 284 South Flores Street, and 208 Fredericksburg Road.

The Staffel Company is introducing several new ant killers. These are designed to exterminate sugar-eating ants, meat-eating ants, red ants and white ants (termites)—and all other kinds and varieties of these pests. Each of these ant killers is guaranteed to do the job satisfactorily to the purchaser, if directions are followed.

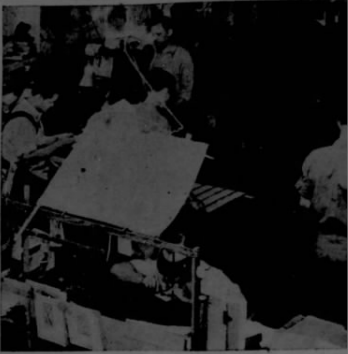

An invitation is extended by the Staffel Co. for persons annoyed by ants, or who wish to prevent annoyance from these pests, to use a trial package, or drum, of the product required for their particular problem.

### BLANKETS, CURTAINS, DRAPES SHOULD BE CLEANED AND STORED

Before blankets, drapes and curtains are stored for the summer, these articles should be cleaned the Dri-Shine way, according to G. W. Bremer, owner of Bremer's Cleaning & Dye Works, 1312 Main avenue. There are many advantages in the use of the Dri-Shine system of cleaning, Mr. Bremer declares.

Dri-Shine cleaning, he points out, is absolutely odorless. It actually restores and prolongs the life and luster of all fabrics. It also is absolutely sanitary, removing all dirt and completely disinfecting. Furthermore, it methods every fabric and thereby protects articles from the ravages of those spots, which in storage,

### Money Spent With Pabst

### BUYERS ASK MORE THAN MEANINGLESS GADGETS, SAYS MUIR

Just as automobile purchasers 15 years ago were content with a long hood and other external evidence of speed, but later learned to look for performance as their standard of selection, so electric refrigerator buyers now are insisting on something more than a pleasing exterior and a few meaningless "gadgets," according to Edwin D. Muir, exclusive Refrigerator Dealer.

"With more people coming into our showroom than ever before at this time of year, we have noticed a growing tendency on the part of these prospective refrigerator buyers to find out important facts about the actual mechanical operation of the refrigerators," Mr. Muir said.

All cards, invitations, etal and merchandise of that kind by the Pabst Engraving Co. Louisa Street, are designed, engraved, embossed and printed the shops and work rooms a pioneer San Antonio firm, has been in business for 14 and is an entirely home-located.

In the picture are some San Antonio workmen of the Engraving Co., shown engaged various tasks in a section of shops of this institution. They are located in the rear of showrooms of the company 1 Louisa Street address.

Every order placed with Pabst Engraving Co. goes to maintenance and prosperity a pioneer, home-owned concern helps make up the payroll of Antonio workmen who spend money in San Antonio, and numerous other firms and names from which the Pabst party purchases supplies and raw.
